LIFELINE EYE FIRMING COMPLEX WITH HSC-X, \$97

These cutting-edge skin care products use the latest stem cell science to stimulate collagen and elastin in order to help restore firmness and smoothness to the skin. Research has shown that stem cells possess a unique and natural ability to repair damaged and injured tissue using their natural proteins, peptides and growth factors inherent in the cells. Damage to the delicate under eye area caused by the sun or chronological aging, including fine lines, wrinkles and skin laxity are all addressed with this targeted wonder cream.

PHILIP KINGSLEY PADDLE BRUSH, \$38

Is your hair long, thick or unruly? This flat paddle brush by Philip Kingsley may be ideal for detangling thick, long hair and for blow-drying straighter styles. Its vented design allows heat to disperse quickly so hair dries fast, limiting the amount of heat damage. The brush also offers anti-static properties to avoid flyaway ends and is cushioned to ensure only gentle pressure is delivered to the scalp.

OMEGA 3 REPLENISHING HAIR TREATMENT, \$36

Imagine never having a bad hair day again. It's possible with the Salon Series by Ouidad. This potent blend of omega fatty acids (Omega 3, 6 and 9) helps restore the natural lipid barrier of the hair, fortifying its protective surface layer, so hair always looks silky and healthy. Plus, its blend of Flax Seed Oil, Passion Fruit Seed Oil and Açai Pulp Oil re-hydrates the hair shaft and replenishes lost moisture, which daily styling may take away.

G.M. COLLIN'S HYDRAMUCINE OPTIMAL GEL, \$62

Using an enticing blend of green tea, tea flower, jasmine, peony and tangerine, this soothing gel is a light, alcohol-free, ultra-fresh formulation designed to increase water content in the skin. It also balances the natural oil secretions of normal to oily skin experiencing dehydration. G.M. Collin is the first to combine pomegranate extract to stimulate the skin's natural channels of hydration using the Asian plants bamboo, water lily and lotus, which increase the capacity of the cells to retain water.
